ABOUT ME

As an Austrian developer who spent several years in Hamburg, I now find myself yearning for the Austrian Alps again. I am currently looking for new opportunities to pursue my passion for frontend development and be able to contribute effectively to a company that resonates with my values.

I'm enthusiastic about writing well-structured, scalable, and maintainable code. I'm highly self-motivated, reliable, and value open communication. In my spare time you can find me travelling to different countries trying to find the most scenic hikes to explore with the scottish highlands being an all-time favourite of mine ;-)

CV

PROFESSIONAL EXPERIENCE

SOFTWARE DEVELOPER

Otto GmbH & Co. KG, since February 2022
[TS, Svelte, Jest, Selenium, Kotlin, Java, MongoDB, AWS]

- Building a micro-service architecture to provide highly-scalable and maintainable after-sales experience
- Collaborating with cross-functional teams ensuring a sharp customer focus
- Implementing frontend optimizations by diving into new technology, e.g. Svelte, web-components, vite

SOFTWARE ENGINEER
